

## *OOWA announces New Program Partner to provide Health Benefits to members!*

OOWA is pleased to announce that GroupHEALTH Benefits has been appointed by the Ontario Onsite Wastewater Association (OOWA) to represent a new 'association sponsored benefits plan' that benefits OOWA members.

Group Health Benefits is a group insurance consulting firm with over 2,000+ national clients including sixty national and regional associations. They have the ability to help organizations like ours by providing a genuine "WOW" experience in enhanced employee benefits. In addition, GroupHEALTH Benefits creatively adds coverage's and services which effectively lower claims on the more expensive portions of the benefits plan. Over the last 30 years, GroupHEALTH Benefits has also created an efficient administration platform which reduces the time you and your staff spend on managing the aspects of the benefits plan that you are responsible for. This has allowed clients to shift their staff to more productive tasks that effect their bottom line.

OOWA is pleased to offer this opportunity to our members and suggest you contact GroupHEALTH Benefits to see how they can make a business case on why you should allow their team to complete an extensive audit of your current benefits plan, or gain an insight to your requirements if you do not have a current plan.
