Job Title:
Intermediate Wastewater Service Technician

About us:

Bergmann North America is an owner-operated business based in Kitchener, ON. Our focus is the design, manufacture, and service of residential and commercial wastewater treatment systems. Our core values are to protect our precious water resources and manage our treatment infrastructure by leading the way in innovative, sustainable and intelligent clean technology solutions with respect for our environment, partnership with our clients, passion of our employees, dedication to quality, and responsibility to our community.

Job Description:

This job will involve installation, operation, and maintenance duties related to wastewater treatment systems and infrastructure. The general responsibilities are listed below and will best suit a dynamic individual with relevant experience and ability to work independently and as part of a team.

- Execution of service contracts for wastewater treatment and related systems including scheduled routine maintenance, operation, troubleshooting, and emergency service.
- Installation of commercial and residential wastewater treatment systems and related infrastructure including, but not limited to, mechanical piping, concrete works, equipment mounting, testing, and startup activities in an outdoor, year-round work environment.
- Sampling of influent sewage and treated effluent in accordance with Ministry of the Environment guidelines
- Shop assembly and testing of mechanical equipment including quality control.
- Driving to remote job sites within southern and central Ontario, including periodic overnight trips
- Limited (infrequent) travel to job sites across Canada for up to one week.

Requirements:

- Related operational or service experience in wastewater treatment or equivalent work experience is an asset
- Secondary school diploma plus post-secondary diploma in related environmental technician discipline, wastewater operators certification (OIT or above) an asset
- Valid Class "G" drivers license or higher with clean driving record
- Data entry skills along with high level attention to detail
- Sound practical knowledge and understanding of wastewater processes and operations, including the design and function of onsite sewage systems an asset
- Aptitude for mechanical equipment operation and maintenance (e.g., pumps, blowers, pressure/gravity piping systems, etc.)

- Aptitude for electrical equipment operation and troubleshooting (e.g., single and 3-phase wiring, microprocessor-based control panels, switches and analog sensors, etc.)
- First Aid certification (may be provided by the Company during employment)
- Confined Space certification (may be provided by the Company during employment)
- Transportation of Dangerous Goods certification (may be provided by the Company during employment)
- WHMIS certification (may be provided by the Company during employment)
- Quick learner, highly organized and ability to troubleshoot and multi-task
- Ability to work in a team environment
- Self-motivated and able to work independently where required
- Excellent communication in English (written and oral), and interpersonal skills
- Available to work forty (40) hours per week with possible on-call schedule
- Ability to lift seventy (70) pounds

We offer:

- Salary depending on experience
- Comprehensive benefits package with 50% RRSP matching
