

Junior Engineer or Technologist Onsite Wastewater Team

Mississauga or Barrie, Ontario

At Burnside the difference is our people. Our employees are our greatest asset and by encouraging continuous growth and supporting personal development our organization benefits from the increased skill and leadership capacity that results.

We have an exciting opportunity for a recent graduate to join our Onsite Wastewater Group in our Barrie or Mississauga office. Other Burnside office locations will be considered for this position on a case-by-case basis.

Our Onsite Wastewater Group is an expanding team within our Environmental business sector, and we require a technically focused person who has interest in onsite sewage systems. Our team delivers a variety of engineering projects related to wastewater servicing in rural areas, as well as other general field and office assignments.

The primary focus of this position will be to assist and support the successful delivery of onsite wastewater related projects, including working with other Professional Engineers, Technologists and support staff to prepare design drawings and reports, as well as liaising with clients and review/ permitting agencies.

This is a great career opportunity for a technically focused person interested in expanding their experience in onsite wastewater systems as the team includes recognized industry leaders working on a wide variety of technically challenging projects.

More specifically, the position will involve the following tasks:

- Provide support to professional engineers and other technical staff on a variety of onsite wastewater projects;
- Produce design drawings using AutoCAD and Civil3D;
- Assist with writing reports and supporting documentation for project submissions;
- Field support as needed, including site evaluation, test pits and soil characterization, as well as construction related support as needed;
- Support to multi discipline project teams as needed;
- Other duties as assigned.

Professional Knowledge & Qualifications

- An Environmental or Civil Engineering Degree, or an Environmental or Civil Engineering Technology Diploma, or a related degree or diploma.
- Membership, in good standing, or potential membership, with Professional Engineers Ontario (PEO) or The Ontario Association of Certified Engineering Technicians and Technologists (OACETT).
- Computer design skills in AutoCAD and Civil3D
- Valid Ontario driver's license and access to a vehicle

Soft Skills

- Strong interpersonal, oral and written communication skills
- Self-motivated with high personal quality expectations and attention to detail
- Demonstrated critical thinking and problem solving abilities

- Organizational and time management skills

Why Choose Burnside?

Are you interested in working for an employer with a 5-decade track record of building a great reputation both internally with their staff and externally with their clients? The Burnside team is a supportive group of colleagues that work together to provide value and service to our clients, while extending care to each other. We know that our employees are our greatest asset, and thus we strive to provide a positive work/life balance.

We offer:

- A collaborative culture where friendship, honesty and respect are part of our core values and practices
- Flexible working hours and office locations, including hybrid working opportunities
- A competitive compensation and benefits package
- RSP company matching plan
- Career growth and professional development opportunities
- Potential for performance-driven bonusing
- Recruiting bonus / finder's fee for referrals
- Wellbeing benefit
- Active social committees
- A welcoming, positive, and inclusive work environment

We are an equal opportunity employer committed to valuing diversity in the workplace and we welcome resumes from all qualified candidates. Burnside will provide reasonable accommodations to applicants with disabilities throughout the entire recruitment, assessment, and selection process, as required. If you are a person with a disability and require an accommodation during these processes, please contact our Human Resources department.

Company Profile – More about us:

Founded in 1970, R.J. Burnside & Associates Limited is a growing values-driven employee-owned multidiscipline engineering and environmental consulting firm with over 400 staff. Our consistent commitment towards investing in technology advancements and training, in addition to encouraging and promoting professional development, has enabled our firm to meet our ongoing and stated goal of continual improvement.

We actively seek to develop relationships with a broad and diversified client base in the Public, Private, Indigenous, and International sectors. We work on a variety of projects throughout Canada, with nine office locations in Ontario and one in Manitoba.

Burnside has expertise in many technical disciplines including air and noise, asset management, buildings, environmental planning and ecology, GIS, hydrogeology, land development, landscape architecture, municipal drainage and peer review, solid waste, stormwater management, structures, transportation planning and design, transit, water and wastewater and well drilling & diagnostics.
